SIDAC

What we do

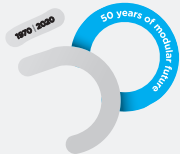

The Company

METALSISTEM is a leading European manufacturer of steel storage systems and integrated material handling solutions, as well as shopfitting and display solutions for large scale distribution.

At METALSISTEM, our time and resources are committed to using the best available state-of-the-art technology and developing our own highly sophisticated manufacturing techniques.

By integrating research and development with the manufacturing process, we are able to offer products that lead the industry in their cost effectiveness and reliability.

We have taken great pride in the durability, quality and innovation of our large product range since 1970.

Das Unternehmen

METALSISTEM ist ein führendes europäisches Unternehmen im Bereich Lagertechnik, Intralogistik und Ladenbau.

Durch den Einsatz modernster Technologie und einer herausragenden werksinternen Fertigungskompetenz werden im Rahmen rationeller Großserienfertigung innovative, preisgünstige und qualitativ hochwertige Produkte hergestellt.

Die Anfänge des Unternehmens gehen bis in das Jahr 1970 zurück. Seither ist METALSISTEM ein weltweit starker und verlässlicher Partner und als solides, inhabergeführtes Spitzenunternehmen nah am Kunden, dank einem weltweit dicht geknüpften Vertriebsnetz.

L'Azienda

METALSISTEM, azienda leader nel settore della logistica di magazzino e della logistica integrata, offre una gamma completa di soluzioni per tutte le esigenze di magazzinaggio e per l'allestimento di spazi commerciali.

Grazie a notevoli investimenti nella ricerca e nello sviluppo, l'utilizzo di tecnologie sofisticate ed un eccellente know-how, METALSISTEM è riconosciuta a livello mondiale per i suoi prodotti innovativi, competitivi e di qualità.

Fondata nel 1970 a Rovereto (Trento), dove si colloca anche la sede principale, METALSISTEM è oggi una realtà produttiva dal respiro mondiale, solida ed affidabile, vicina al cliente grazie alla sua estesa rete di partner internazionali in tutto il mondo.

Product certifications

Quality, corner stone of METALSISTEM's philosophy, is a state of mind applied right from the purchase of the steel coils from the worlds largest steel mills.

Only prime quality 3.1 certified high tensile steel coils conforming with the EN 10204 standards are used for the manufacture of the METALSISTEM range of products.

The steel coils are galvanized using the

SENDZIMIR procedure guaranteeing high levels of durability and elevated corrosion resistance.

All components are produced on automated lines employing the highest level of roll forming production technology available in the world today.
